**Subject:** Re: Stream Alteration Permits

Hi Dave - Take a look at  
<http://nrwrt1.nr.state.ut.us/strmalt/default.asp>  
and explore the fact sheets and application process.

This is where you need to start to permit the stream crossings, the "Joint Application" (explore the website) is an application for both the Army Corps of Engineers and the State of Utah.

Then that approval for a new stream crossing would feed into your new mine plan amendment with Leslie. DWQ will be advisors to DOGM on the water quality issues for your new mine plan.

Hope this helps.
